NEW INFANT INCUBATOR GAINS FDA 510(K) CLEARANCE

THURSDAY, JUNE 29, 2006: IVYLAND, PA USA: NeoForce Group, Inc. announced that they have received clearance from the US Food and Drug Administration to begin promotion of the Atom V-2200 Infant Incubator. The Atom Model V-2200 Incubator features a unique multi-functional color display that when combined with optional Masimo Set® pulse oximetry (510(k) Pending) and servo oxygen control gives you unprecedented control and monitoring of your infants condition and environment.

This highly featured and configurable incubator is designed to meet a wide range of patients from your most challenging VLBW infant to the feeder/grower infants

Standard features include:

- Dual access doors with baby-safe locking system
- High contrast 256 color LCD display, adjustable from either side
- Fully removable humidity system for optimal infection control
- Ultra quiet hi-low stand that in it's lowest position supports parental bonding
- Currently the quietest incubator available (43dB)
- Ergonomically designed sensor module-easy to see and access for probe insertion
